Why Egyptian Cuisine?

As you read on, especially through the recipes, you'll make many discoveries about Egyptian cuisines. People from Egypt have different approaches to preparing meals, especially from meats, soups, veggies, baked goods, among others.

To shed more light on Egyptian cuisines, the meal choices were influenced by the River Nile and the rich soil that provided solutions for growing crops and keeping livestock. That's why you'll encounter several recipes made up of legumes, vegetables, and meat. (beef, chicken, squabs, lamb, and other dairy products).

Some of the common vegetables in Egypt that were influenced by the River Nile and rich soil include:

- Eggplants
- Tomatoes
- Bell peppers
- Okra
- Squash
- Spinach
- Cabbage
- Celery
- Leeks
- Cucumber
- Beans
- Peas

Rice is also common in Egypt. In fact, you'll realize that most stuffed meals have rice as an ingredient. The fact that Egypt has a large percentage of Muslims directly influences the types of cuisines available. That's why although much as there are many meat recipes, you won't come across recipes made from pork. Again, their cultural practices and cooking style reflects the Islamic and Arabic cultures. The common spices used in

Egyptian cuisines include cinnamon, black pepper, cumin, coriander, dukkah, among many more.

You can enjoy Egyptian-based cuisines that are rich in aroma and flavors. Below are some special recipes from Egypt you can sample:

- Koshari
- Kofta
- Singari fish
- Hawawshi
- Molokhia shrimp

These are just a few examples of the best aromatic recipes from Egypt. I loved the Eid Cookies because of their sweetness and soft texture. Yet don't limit your capabilities, because this cookbook has 111 recipes worth trying!

Egypt

Egypt is a country found in the north of Africa. It's the 3rd popular country in Africa and the most popular in the Arab world, with an estimate of 99 million people. River Nile gives Egypt a turning point for economic activities such as agriculture. Some of the exciting facts about Egypt include the following:

- Cairo is Egypt's capital city, and it has remained the capital city for over 1000 years. However, the government is about to create another capital city near Cairo's east to manage congestion.
- Egypt invented the 365-day calendar with twelve months.
- Egypt is a homogeneous country with more than 99% of the entire population comprising of Egyptians.
- Egypt comprises mainly Muslims at 90%, while Christians and other denominations encompass 10%.
- The country serves as a home to seven UNESCO World Heritage sites.
- Between 950 and 710 B.C, Ancient Egypt produced the first prosthetic limb in the world.

Any social media account with 5,000 followers and above must operate under the country's media law rules. The government and related authorities monitor such accounts.

One aspect I loved about Egypt is the cuisine choices. I once visited the country, so I can attest that their meals are exceptional. I was eager to try new meals, and I loved every single aspect of them. From breakfasts to main meals, to desserts, each meal had a special touch.

The Egyptian climate is a semi-dessert. It experiences moderate winters with little rainfall, while summers are always hot. The Nile River is the main source of water in Egypt. There are many things you can explore in Egypt. If you plan to travel to Egypt, you might consider visiting the following places:

- Pyramids of Giza
- Islamic Cairo
- Aswan
- Egyptian Museum
- The white dessert
- Siwa Oasis
- Alexandria
- South Sinai
- Nile cruising

All these places will give you many new and fresh experiences. There are many other places, and you interact with the locals, so you can learn more.
